Dear Hiring Manager,

A seasoned technology leader with 25+ years of experience, I'm a passionate architect, mentor, and entrepreneur driven by curiosity and a relentless pursuit of innovation. My journey began with a free-spirited offer to work for free, a testament to my early passion for technology.

I've honed my skills across diverse industries, from leading Enterprise Architecture for Cox Enterprises, the world's largest privately held company by revenue, to guiding startups through Project Runway. My expertise spans a wide range of technologies, including cloud (Azure Architect Expert), cybersecurity, blockchain, Web3, and data centers.

A proven leader, I've directed EA teams, managed multi-million-dollar IT budgets, and co-founded two successful companies: MT Mining Company and Creative Social NFT Inc. My entrepreneurial spirit is further reflected in my active participation in hackathons, with a successful track record of 10 placements.

I believe in the power of relationships and the importance of continuous learning. My farm upbringing instilled in me a strong work ethic, but I've learned that success hinges on collaboration and a deep understanding of human connection.

I'm dedicated to mentoring the next generation of tech leaders and exploring the transformative potential of emerging technologies.

Sincerely,

Mike Reams
